

2 February 2004
SRS Review
Version of SRS: 1.1.0

| Requirement | Comment |
|--------------------------|---|
| LogsOut | User confirmation on log out. |
| General | Using the term 'at any time'. 2.1.1 and 2.1.1.1 |
| General | Identify 'Modes'. Possibly add a state diagram. |
| General | "The system shall..." verses "The user shall...". Need to introduce the user actor into the document. |
| CreateElement | Report is an element. |
| CreateElement | Need to reorder some of the requirements so they do not 'forward reference'. |
| DeleteElement | User confirmations for deletions and exits. Identify all instances where user confirmation can be used. |
| CreateElementInsertSaved | Re-word for clarity. |
| CreateElementInsertBase | User inserts attribute values. |
| General | Attributes verses Values. Semantics need to be fixed. |
| CreateElement | Saving 'element'? verses saving 'values'? |
| 2.3.1 | Can only preview post creation. |
| Priority | Need to set priorities. |
| 2.3.4 | Wording. Making reference to UI. |
| 2.3.4.1 | Wording is wrong, where does the system state go to? Within preview mode. |
| Preview | Can also go to save without preview. |
| 2.4 | Forgot to add report. |
| 2.4.1 | Remove database reference. |
| ElementTypes | Issues with the operations. No need for splitters if output can go to multiple inputs. |
| ElementTypes | Need to be able to reference to one particular element, not to the generic class of the operation. Class verses Instance. |
| ElementTypes | Descriptions of operations are not detailed enough. Need to review and define operations at a more detailed level. |
| 2.4.2.11 | Wording is off. |
| 2.4.2.12 | Define time correlation. Why only two? |
| 2.4.2.13 | What's it mean to subtract three or more? Same for divide. |
| General | What happens when illegal operations happens? Exception handling. |
| 2.4.3 | Rewarding, and referring to Generators. |
| 3 | Element type, not subtypes. Wording problems. |
| 3.x | Redundancy, Save Element verses Save each of the types of Element. |
| 3.1.1.1 | Confirmation from user. |
| General | User is not specified anywhere. |
| 3.2.1 | Referring to instance verses general type. |
| General | Identify 'Base' operations and user implemented operations. |

| | |
|-----------|--|
| General | How to deal with deletion of an element, which is used in a composite element. |
| 4.2 | Readjust all the exports. Collapse al the sublevels of 4.2.x. |
| Figure 3 | Wording need to be consistent to requirements. (Adam wins) |
| Figure 8 | Add example of how it looks referring a real operation. |
| Figure 10 | Save and Execute? |
| Figure 13 | Delete, not Ok. |
| General | Might want to cover the CUI functionality. |
| General | User cancellation missing from some requirements. |
