

## Standup

Sara: Setting up Mac, then continuing Sencha stuff

Barriers: Cordova on Mac having some command line issues

Stephan: Placemarkers adjusted

Working on UI for groups

Barriers: Have to redownload icon package from FlatIcons to change markers

Don't know where all Bike NY Icons are

Lots of dependencies

Josh: Working on transactional scripts for Android

Will start working on code within a day

Barriers: Linux server

Lots of work needs to be done in the API

Need to get login info or create our own instance

Tom: Android code ready to deploy as soon as Lee gives the thumbs up

Continuing server work unless Josh or Sara need assistance with native transactional scripts

Barriers: None at the moment
