- **POST /device-observers**
  - <u>Description:</u> Internal Use Only. Used by Disaster Tracking APIs to add an "observer" that will cause Datto to notify Disaster Tracker when a device is added (triggering a POST) or deleted (triggering a DELETE). See the Architecture Document for Disaster Tracker for specification on these calls.
  - <u>Authenticated Users:</u> Datto Intranet
  - <u>Input Format:</u> (JSON)

```
{
      resource: 'http://server/api/devices'
}
```

<u>Output Format:</u> HTTP 201 (Created)

```
{
      id: String,
      uri: String
}
```
