

Week 1 - Tuesday
Sponsor Meeting
Sprint 6
Start: 5:00pm
End:

Agenda

1. Review Risks Document
 2. Discussions
 - a. Review Plans for Second Semester
 - b. Push Notifications
 - i. Developer Account - <https://developer.apple.com/programs/ios/>
 - ii. Test device?
 - c. Review Upcoming Sprint
 3. Questions?
-
- Push notification risk - they're not 100% reliable. Some notifications may not deliver successfully and know about it.
 - Might require a bit more on the app in order to ensure the notifications are being sent/received.
 - Question - Importance of Push Notifications to Datto
 - **As long the info is accurate.**
 - **Not a huge concern over how reliable it must be.**
 - Main goals starting out the semester: OAuth Server, Push Notifications/Mobile Stuff, and Weather related items/algorithm.
 - Chris to look into the developer account(Datto may already have one). Chris will also look into a possible test device.
 - Go over Trello board.
 - Installing PHPMD
 - Implementing OAuth Server
 - Storyboarding for receiving Push Notifications
 - Actual app receiving Push Notifications
 - Create a Test Plan
 - Cron Job
 - Will be improved as it goes along to do more things.
 - SPIKE: How to get weather info onto the devices/algorithm
 - How intelligently do it. By states?, counties? Custom Grids? etc.
 - Product Backlog
 - Should cover at least the next 2 sprints, but will be expanded.
 - Aaron's question: Chris does not have or know if there is such information.
 - **For next week:**
 - **Updated Project Plan to be presented next meeting.**

- **TBD Dates solidified**
- **Needed changes**
- **Continue time tracking**
- **Set reasonable expectations for testing, how handoffs will work, formal acceptance testing etc.**
- **Remind Professor Malachosky to look into getting us an iOS device.**

Hey Chris,

Just some action items that came out of this meeting:

- Would you be able to give us the schema for the MSP database and an example row? We think this will be helpful when implementing a mock OAuth server that will authenticate a MSP or Datto employee.
- Could you look if Datto has an Apple Developer account? If not, we will need one, which can be acquired at:
<https://developer.apple.com/programs/start/ios/>

Thanks,
Brandon
