

Meeting Minutes for 11/11/14

Start: 5:00pm

End: 6:15pm

Agenda

1. Review Risks Document
 - a. 1 new risk added - #11 which involves the weather API and how the team may need to switch to another API.
2. Review Sprint Progress
 - a. End of Sprint 3, starting Sprint 4
 - i. Interim presentation may take the team a sizeable amount of time that must be accounted for. Shouldn't impact the sprint too much but it is to be kept in mind.
 - ii. Discussion on story points to be completed for the next sprint.
 - b. Demo - SQL persistence, DB is seeded, device dotmap
 - i. Some code shown regarding the database.
 - ii. Front end shown with the map and the dots to show the data is being pulled from the database.
 - iii. Brief update on testing.
3. Linode Server
 - a. Linode server should be ready for tomorrow.
4. Filtering of devices conversation
 - a. What should it look like - buttons, slider
 - b. Filtering logic - API vs client side
 - c. Is filtering available on mobile app?
 - i. **A slider, with the highest risk at the top.**
 - ii. **Other kind of slider - sectioned off: 25%, 50%, 75% etc.**
 - iii. **High, medium, low might be more used - in that case modes makes more sense. No one will really care about 21% or 45% etc. Needs to be fine tuned.**
 - iv. **All, High, Medium, Low - Just need to figure out the numbers behind each of those.**
 - v. **Filtering mostly for MSPs, show all on the mobile version. Filtering may not need to be used in the mobile version.**
 - vi. **Leads to a change of the MSP view.**
5. Questions?
 - a. **How many devices to MSPs usually have?**
 - i. **About 100 or so.**
 - b. **How is the deployment for MSPs? Is it separate?**
 - i. **In the login perhaps differentiate if its a Datto employee or MSP?**
 1. **Assumption: its only for Datto**

- a. **This means there is a separate deployment for MSPs then.**
 - ii. **How do they log in?**
 - 1. **Kinda like the MSPs - SAML for now.**
 - 2. **Datto employees have MSP-like credentials.**
- c. **New Risk: log-in risks.**
 - i. **Sponsor may not know with certainty how things are structured.**
 - ii. **Could be multiple-log in etc. No concrete answer yet.**
 - iii. **Mitigation: change it if need be. Make a module that handles the log-in and change it as needed.**
- d. **Any new requirement for the mobile, in general?**
 - i. **Nope.**

After the meeting

- Have interim presentation ready to show professor a week before thanksgiving break.
- Future team problem: OAuth stuff.
