

Went over user stories - all look good.

Focus on where MSPs have their products.

Show things like:

- Device ID
- Reseller Name (not important actually)

Clicking->Zoom in view.

Zoomed Out->Populated by things in the area.

Zooming in, sort of like a filter.

MSPs can look up customers by Device IDs

When sprints will occur on the calendar, code freeze at week 12, and **reduce to 2-week sprints.**

- Show weather across map for both internal and external, but show zoomed in view for external users.
- Login will be mocked data for now.
- Have a list on the side of the map of the highest risk devices.
 - Each device will be listed by its device ID.
 - This list will be filtered based on zoom level. (Only list shown devices)
- When clicking on a high risk area of heatmap, zoom into that area.

Break up the “adopting technologies” risk. Don’t have a probability of 1.

Also break up Risk #3 as well.

Todo:

- Project Plan - Schedule wasn’t finished (clean it up)
- Fix the timesheets
- Break down user stories
- Break down risks
