# Testing

❧   ❧
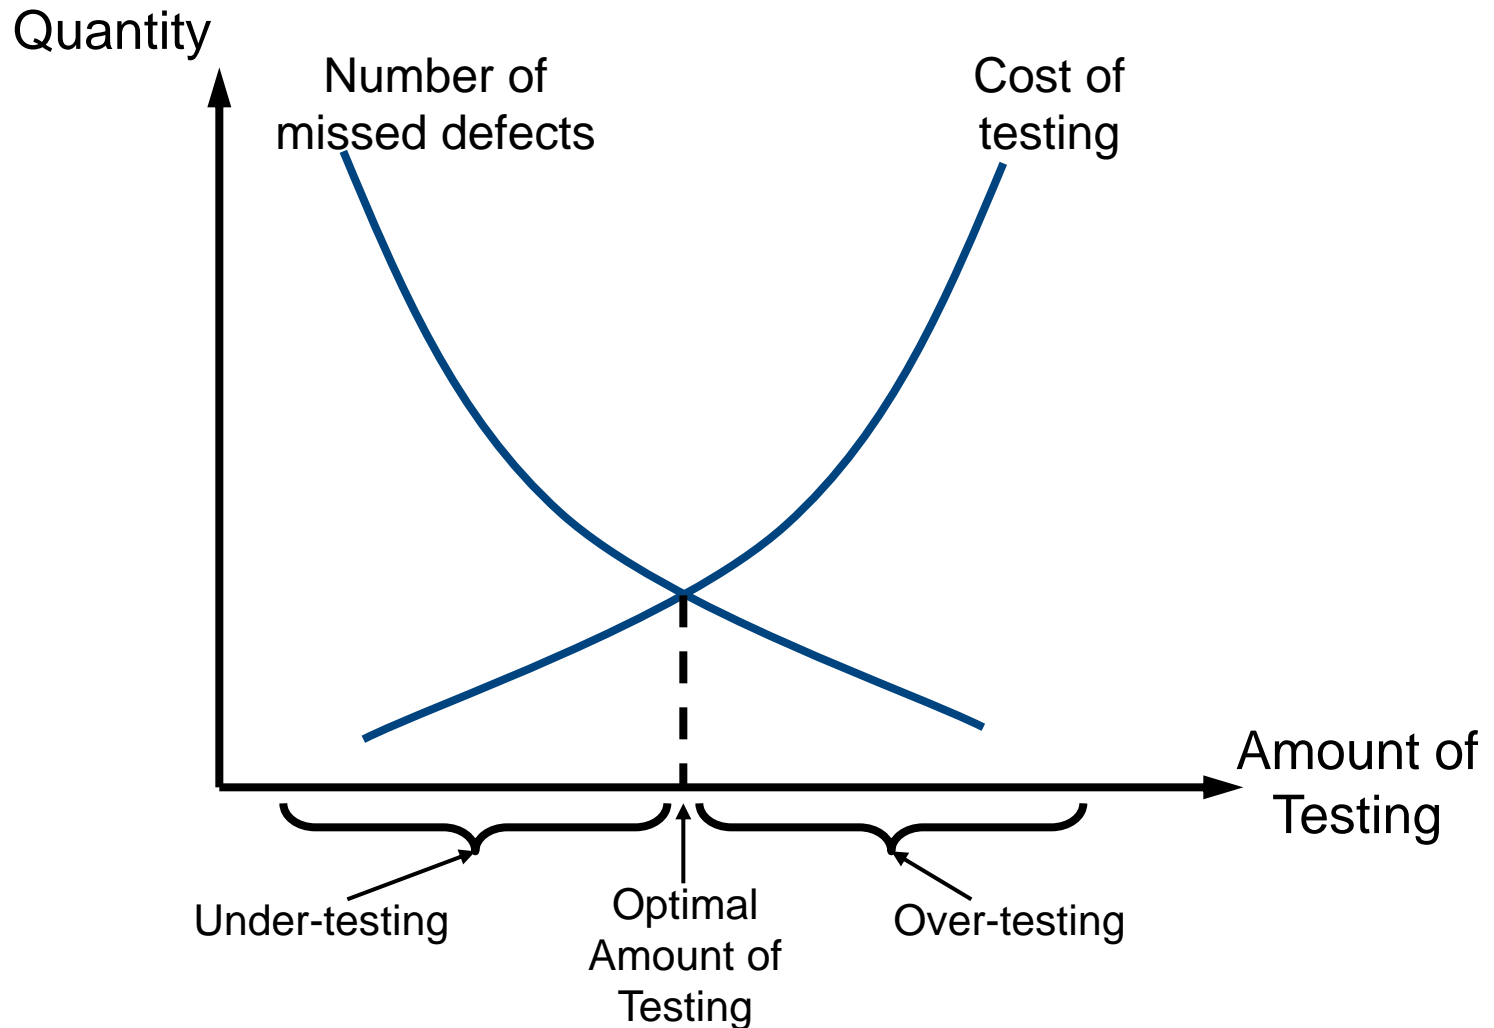

SWEN 256 – Software Process & Project Management

The V Model

Testing Strategy

 Largely derived from Process Model used by the team/organization
  - Should include when to test, who is responsible for testing, and what will be tested
 What types of testing are appropriate?
 "Using" Use Cases & Test Cases – What order, priority?
 What are the testing-related risks?
 Are there testing patterns and antipatterns that should be considered?
 Are there Measurements and Metrics that should be recorded / utilized? Who records? When? What is done with the results?

Testing Sweet Spot
