

## Software Engineering Senior Project Review

INSTRUCTIONS:

Assess each team's project through their discussion, answering of questions, poster, and demo. For each Review Dimension, enter your evaluation of the team on a 5 point scale, where 5 is EXCELLENT and 1 is POOR. Feel free to ask the hard, critical questions to evaluate the team's understanding of their project, and ability to articulate it.

Judge: «Reviewer»	Project Team - Number			
Review Dimensions	«P1»	«P2»	«P3»	«P4»
The team has a clear understanding of the project requirements.				
The team justified the system design as the most appropriate for this application.				
The team has followed a defined software process methodology.				
Quality of the project demo (leave blank if you did not see a demo)				
The poster provided a good summary of the project in terms of a clear statement of the objectives, and a clear explanation of the project and process information.				
Poster Aesthetics (appearance, clear, readable, visual impact, appropriate use of graphics and visuals)				
The students answered questions well (direct and concise answers, confident).				
The students' presentation skills (volume, pace, natural/not scripted, enthusiasm)				
Overall quality of the project work itself considering all elements (discussion, poster, demo)
