

9/22 Notes:

Fly around in 3d space among a macro-molecule collecting things and avoiding the macro-molecule. To be expanded on in the future.

What are the requirements for Student Tracking?

- Account Signup?
- Open or closed?
- What do we need to track?

Which platform is a priority?

What is the goal?

- Is it to collect smaller molecules while avoiding large molecules?

How is this challenging/fun/difficult?

- Lots of objects to avoid?
- Flying aspect is fun?

Using Unity with Javascript

Before Tuesday:

- Come up with customer questions to determine user stories
- Create project plan, risk table
- Team information on project website

Thursday: User Stories, start sprint 0
