4:00 meeting start

go over time tracking w/ dr. hawker

dev environments - dependency issues, look into dep. management solutions
      Jenkins?

establishing baseline for requirements volatility - can we use it as-is or does the SRS need more updates before it's ready to begin working from
      need to define volatility in a way that is useful to us as a metric for measuring project
      success

re loaner Macbook - usually only available for ~one month, difficulties with installing new software.
