**Progress:**
- Researched specific technology
- We showed cases to Vallino.
- Designed a couple more wireframes
- Gave Vallino a project plan for the next 2 weeks
- Refine the Requirement Document, Use Cases Document, and the Permission Document

**This Week**
- Refine the Requirement Document, Use Cases Document, and the Permission Document
- Start iterative 0
  - feature list (write down features, verb/actions/noun)
    - organize in categories
  - an early object model (just enough to have a basis, live update)
  - plan by feature (giving out ownership and time estimation)
- Get technology set up
- design more wireframes
- peer review
- Continue to learn nodejs and angularjs

**Risks and Metrics - log our work. Ex: documentation**

| Risk | Notes |
| --- | --- |
| Trouble setting up environment | RE is .1 week |

| Metric | This Week | Last Week |
| --- | --- | --- |
| Researching technology | 3 hr | 5 hr |
| Codeacademy | 4 hr | 4 hr |
| Wireframes | 3 hr | 6 hr |

**Actions and Decisions**

| Item | Assigned To | Notes |
| --- | --- | --- |
| Meet with Kiser | whole Team | |
| Consult notes into documents | Whole team | Requirement documents |

| | | |
|---|---|---|
| case study | 6 hr | 4 hr |
| permission document | 2 hr | 3 hr |

**^ break this down into categories, specific things (eg, learning codeacademy)**
