

Actions to be Taken

Team

- Fix installer to correctly locate MongoDB

Paul

- Play around with the application on your machine

Meeting Notes

- Checkin:
 - Styling on name of program
 - Student filtering
 - Filter by 9 at a time like on wireframe
 - Size constraint? Possible change to different number of students at once
- Installer:
 - localhost:9000/checkin/home
 - (ip address):9000 for tablets
 - Write steps to install properly mongodb service so same installer can still be used even if fix is made
