

## Actions to be Taken

### Team

- Study up on:
  - AngularJS and how it's used in the example project skeleton
  - Grunt taskrunner
  - NodeJS
  - RequireJS

### Paul (ongoing)

- Send copy of attendance card broken down into sections
- Take a look at Asana (tablet app?)

## Meeting Notes

Continued risk estimation.

A GitHub repository has been created for the project.

All members of Team TTKD now have the required technologies and dependencies installed and configured for development.

“Division of labor” discussion (things to consider before designing an architecture)

- Authorization
- Authentication
- Registration
- GUI/CSS/Javascript
- Database
- Fault Tolerance
- Backup
- Portability
- Embedded web server
- Usability, performance.....

### Open Questions

- *None*
