

Actions to be Taken

Team

-

Meeting Notes

New feature (?): Session timeout

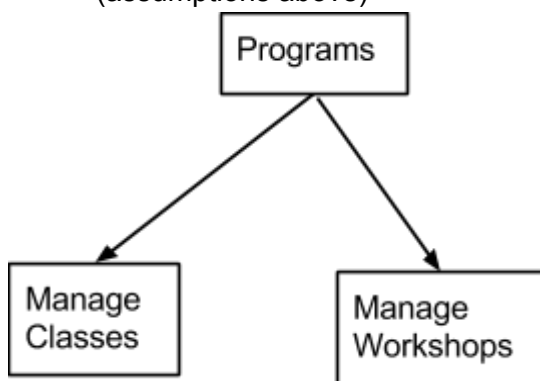

Begin wireframe prototypes

Continuation of discussion of subsystems:

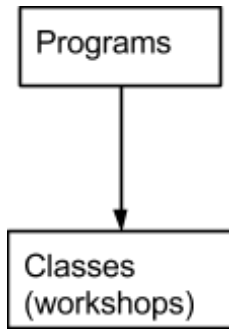

- Workshops will be managed separately from classes
- Classes can only be managed through programs

Classes vs. Workshops

- Classes
 - Have a roster (list of students in class) that rolls over between each class
 - Roster used for attendance review
 - Roster used for progression tracking/review
- Workshops
 - Attendance is not tracked
 - Roster is taken as a list of those who are registered, and is not reviewed
 - Rosters do not roll over
- ***Option 1 - Manage workshops separately from classes:**
 - Better represents functional differences between classes and workshops (assumptions above)

- **Option 2 - Manage workshops *as classes***
